

REMARKS

Claims 1-33 were originally filed and claims 1-33 are cancelled. New claims 34-47 have been added. Accordingly, claims 34-47 remain in the subject application.

Applicant has amended the above paragraphs of the specification to correct typographical errors that occurred in the original filing. Applicant has also added reference number 115 to refer to the material support. No new matter has been introduced in any of these amendments.

Applicant also submits herewith replacement sheets for each of the originally filed drawings. Applicant has added reference number 115 to Figure 9 and has formalized the remaining reference numerals. No new matter is believed to have been introduced in the replacement sheets.

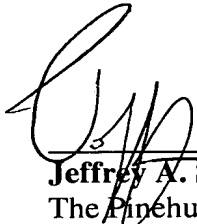

New claims 34-47 are directed towards a table assembly for supporting a workpiece. In claims 1-33, as originally filed, the subject invention was directed toward a saw table. The subject invention has been broadened to cover any table assembly for supporting a workpiece and not specifically limited to a saw table. Any table assembly, such as a work bench, that supports a workpiece may utilize the rotatable material supports of the subject invention. Therefore, the subject invention, as amended, is not limited to any particular table assembly.

The entrance of this preliminary amendment for the purposes of filing the attached continuation application is respectfully submitted.

Respectfully submitted
